

# Diesel ECO Plus

www.siriusmarine.co.uk/oneshot

50ml  
treats  
100 Litres

- Delivers optimum torque & power
- Enhances starting
- Lower fuel consumption
- Lower smoke & emissions
- Reduces sludge
- Inhibits microbial contamination

## Why worry when cruising the waterways?

Red Diesel composition changed in 2011. Reduced sulphur (natural biocide) and increased Biodiesel (7%) has led to a series of potential issues for diesel boat owners. When cruising the waterways you will at some point need to refuel, and as fuel sources cannot always be guaranteed, it is recommended that you check the fuel sources for "Diesel Bug" and other contaminants. This is especially important after winter or prior to the last refuel before winter storage.

**OneShot Diesel ECO Plus** was developed to remove this uncertainty by providing a complete solution to red diesel storage issues and maximise marine diesel engine performance.

OneShot Diesel ECO Plus contains antioxidants, a bug biocide, and improves lubrication of internal engine parts providing a complete conditioning of your fuel to ensure your engine is cleaned and protected whilst cruising the waterways. It does all this while maximising fuel economy and reducing the environmental impact of your diesel emissions.

Used immediately prior to every refuel will ensure your engine and fuel delivers when it matters. *OneShot Diesel ECO Plus* is your continuous fuel, tank and engine conditioner in a bottle.

Prevents Diesel Bug

Cleans Engine parts and fuel lines

Reduces particulates & emissions

**OneShot Diesel ECO Plus** should be added to the fuel tank prior to every refuel, ensuring maximum protection and performance while cruising the waterways and coast.

**A 1 Litre bottle of OneShot Diesel ECO Plus treats up to 2000 litres of fuel!**
